BlueFletch Enterprise Benefits

Simplify User Log-in on Shared Devices

Single sign-on support for all major Identity Providers (Okta, AzureAD, etc).
SSO support for web apps, native apps, and telnet apps. Fast re-authentication with NFC, biometrics, barcodes, PIN or with FIDO2 and PIV.

Minimize Lost or Stolen Devices

View device locations in real time with automated alerts for misplaced devices. Seamless device check-in/out for greater user accountability. Automated data wipe for stolen and missing devices.

Improve Shared Device Experience for Users

Customized widgets, badging based on user. Enterprise-grade secure chat with PTT, text, video, and voice. Secure notifications and safety features including motion lock for drivers
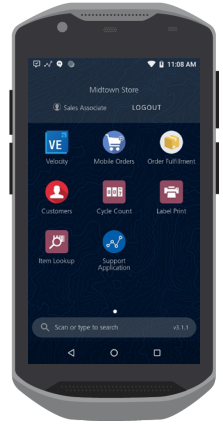

Reduce the Cost to Support Devices

Background service collects real-time telemetry data like battery status, OS, patches, restarts, app version, app usage. Interactive support application for end-users reduces help desk calls.
